

ICC Profile Scope Document

Pre engagement questionnaire and checklist

Customer:

Date:

Stora Enso offers a service to current and potential customers to best match Stora Enso Paper and customers printing press using ICC Profiling. This document contains the scope of the ICC Profile creation, a pre engagement questionnaire and checklist in order to make sure all details are in place before profiling activity.

The objective of this project is that Stora Enso will supply a new ICC Profile for the customers printer that is tailormade for our products. Our aim is to create a profile that is superior to the current setup that the customer is using and that we're able to help our customer to steer the profile to their needs.

Pre engagement questionnaire

Yes No

Have you engaged with creating ICC Profiles before?

If yes please elaborate below on which company, for what products and at what result.

What kind of ICC Profile are you using today?

What are the expectations you're looking for creating a ICC Profile?

Which machine, generation of ink and which kind of ink are you using?

What kind of applications are you printing for? For example: transactional, direct mailing, brochures etc.

What is the colour space / ICC standard that you operate with today?

ICC Profile Checklist

Customer requirements before visit

- 1.1 Print the received color chart 5 times without any colour management for the printer
- 1.2. Make sure that you have disabled any third party software that could influence the print result
2. Print the received sample picture 5 times on your default profile setup
3. Make sure you have access to ICC Profile settings for the printer
4. Organize a small workspace (small desk or table) for us to operate our scanning table on with access to power

Customer requirement during visit

1. Make sure you have an operator in place with skills to print the color chart and insert the updated ICC Profile
2. Allocate time for an operator and press to do print runs that takes max 10 minutes/run at a 30 minute interval. We need about 5-8 runs until we've created the final profile.
4. The printer should be prepared to start upon agreed arrival time with our paper
