8.2.2023

Stora Enso Packaging Materials Division, multi-site certification update for FSC® and PEFC™ Chain of Custody

Stora Enso Paper Division has previously had their own FSC and PEFC CoC certificates, following the divestment of Paper Division the following mills have been added to the existing multisite of Stora Enso Packaging Materials Division:

Anjala Mill

Langerbrugge Mill

This change will impact the certification numbers shown on all order, invoice and delivery documents of FSC- and PEFC certified orders and FSC Controlled Wood orders.

<u>Certification status</u>	<u>Old Claim text</u>	<u>New Claim text</u>
FSC certified	FSC Mix Credit/FSC Recycled, DNV-COC-000020	FSC Mix Credit/FSC Recycled INS-COC-100054
FSC Controlled Wood	FSC Controlled Wood, DNV-CW-000020	FSC Controlled Wood INS-CW-100054
PEFC certified	100 % PEFC certified, 88484-2010-AE-FIN-FINAS	100 % PEFC certified 8949-06

The change will be in effect from 1.2.2023 onward.

Orders confirmed after mid-February 2023 will bear the new certificate numbers, whereas orders confirmed before that but delivered and/or invoiced after mid-February will still be delivered with numbers of the old multi-site certificates.

Hence both numbers will be parallel in use during a transition period. The length the transition period is approximately one year.

This change will not affect product availability or our processes concerning certified orders.

Paper Division mills

Anjala Mill, Finland
Langerbrugge Mill,
Belgium

Packaging Materials multisite

Fors Mill, Sweden
Forshaga Mill, Sweden
